**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/8/05 has been entered.

***Examiner's Comments***

2. Claim 66 recites the limitation "prepared from" which could be construed as a method limitation. It is respectfully suggested that applicant change the limitation "prepared from" to - - comprising - -.

**REJECTIONS WITHDRAWN**

3. All of the 103(a) and obviousness-type double patenting rejections maintained in the final rejection of 8/9/05, page 2, paragraph 2 have been withdrawn.

**REJECTIONS REPEATED**

4. There are no rejections repeated.

**NEW REJECTIONS**

### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 68-80 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6416829 or claims 1-20 of U.S. Patent No. 6129653 or claims 1-21 of U.S. Patent No. 6482481 or claims 1-5 of U.S. Patent No. 6565934. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the patents listed above completely encompass the scope of at least independent claim 68 of a heat insulating paper cup having a body member with an unfoamed modified low density polyethylene on an inner surface and an outer foamed layer of low density polyethylene, a bottom panel sealed to the body member wherein the bottom panel is coated with an unfoamed, modified or unmodified low density polyethylene.

### **ANSWERS TO APPLICANT'S ARGUMENTS**

7. Applicant's arguments filed 12/9/05 have been carefully considered but are moot in view of the new grounds for rejection set forth above.
